

I urge you to vote NO on this bill. This is a direct circumvention of rights of parents to practice their religious beliefs. The bombardment of vaccines today, is nothing like the vaccines of the days of my children. Many of the diseases they are vaccinating for are quite rare, or very low risk of infection. I have an autistic grandson as a result of this assault of vaccines, something that was rarely heard of when my children were growing up. I have also never understood the fear behind these types of legislation....if your child is vaccinated, and you are sure the vaccine works, then what are you afraid of? Please vote "no" on this unnecessary bill.

Sincerely,

Cindy Frazier
