

Hello legislative members,

I am writing today as a worried mother. For I fear my personal, medical, religious/philosophical freedoms are being infringed upon. If you allow this unjust and unconstitutional bill to pass you are saying you want to mandate vaccines. That you do not care about children's right to education, medical freedom, bodily autonomy, and religious/philosophical freedom. Please do not be like a fascist unjust cold lacking-freedom country. Vaccines are already required for school. There is NO reason to make any changes to this current rule.

There will be repercussions for this. It could cause huge issues for the economical climate. Trust me parents like us will either pull our kids from school, get medical exemptions, or LEAVE/MOVE!! Listen to the people/constituents... not the corporations, pharmaceutical companies and lobbyists.

Heart-fully and tearfully but with hope,

Kayla Leonard
