

To whom this may concern,

Retaining the right to vaccinate or not vaccinate my children is imperative to me as a parent.

The government has no business mandating health care for my children or has any business knowing what I do and don't vaccinate my children against.

The fact that my daughter can get an abortion without telling me (her parent), but I cannot selectively vaccinate my children is appalling.

Please vote to keep parents rights to vaccinate or not.

Thank you,

Gatlen Richardson
