

Dear representatives, we are opposed to HB 3063, removing all exemptions except medical is akin to an assault on religious and philosophical freedom. Interference in the doctor/patient relationship. Interference with informed consent: coercion, they are taking away our child's right to an education if we don't consent to vaccination, short of medical exemption and what if we can't get a medical exemption? We are well informed and aware of the risk of the diseases the vaccines supposedly prevent, however based on medical experts the case is very strong that they are not only not preventing said diseases but wreaking havoc on the autoimmune system, case in point one article entitled "Attacking Ourselves: Top Doctors Reveal Vaccines Turn Our Immune System Against Us" You may find a link here to this article <http://www.greenmedinfo.com/blog/attacking-ourselves-top-doctors-reveal-vaccines-turn-our-immune-system-against-us>? We strongly urge you to not support HB 3063, forcing anything on citizens especially choices that affect them and their children is not American and is moving in the wrong direction of democracy! Whether there are scientific studies paid for by corporate interests or not.

Sincerely,

Bryan Landen  
Dayna Colvin
