

I'm writing to voice my opposition to HB-3063.

I do not believe it is morally right to force people to vaccinate their children. I believe that in America you have the freedom and right to chose what is best for your family. Vaccines are not held to the same safety standards as any other medical devices and products. That is really troubling if you are a parent putting your small child in the hands of doctors who make money when your child is sick. For this reason and many more that I'm sure you have read over and over I strongly urge you not to pass this bill. I know that you won't know who I am and probably won't care much but, there are people out here who want the best for our families and will have to leave Oregon if this is passed. Most are just starting out and can't afford to pack up and leave but, will have to anyways. So their kids will be able to have an education. I sincerely hope you listen to the people who are begging you not to let this pass.
