

As a mother of a young child I have been very informed about vaccinations there repercussions and benefits and I choose to vaccinate my child with safe knowledge and in a more friendly spaced out matter. I oppose this(HB 3063) and the force of vaccinations on people as we have free rights as how we should take care of our children the government should not. There are many facts that say how vaccinations cause death and can be harmful the way the cdc scheduled is suggesting. Please take in consideration that you could be harming the american children rather then benefiting them by giving vaccinations too soon or in such large doses or at all. Please for god grace on the future of are children let the Oregon personal belief exemptions continue.
