

I believe parents, not government should decide what vaccines their children get. Vaccines have not been tested. I have gotten I'll from the flu shot whenever I have go tten one. I am sure that does not happen to everyone. Our rights are being taken away from us. Babies and children are being given so many more shots than before. What's the deal with that? Big Pharma needs to make their money. Please vote against HB 3063. Sincerely Mary Buckingham
