Subject: Testimony - NO on HB 3063
Date: Wednesday, February 27, 2019 2:27:34 PM

Hello,

I am Jenny Downen from Monmouth, Oregon, a parent of a child with Autoimmune Disease. My child relies on the philosophical exemption to vaccines to attend school, as a medical exemption is unattainable. HB 3063's removal of philosophical exemptions from vaccines will prevent my child from going to school for an education.

If this bill passes and my child is required to 'catch up' on 22+ vaccinations I fear her health will be negatively impacted and could potentially cause a vaccine injury. I am not willing to put my child's health at risk.

If this bill passes I will be forced to home school my child while I continue to work a full time job. My local school district, and school districts throughout Oregon will be negatively impacted financially as thousands of children will be removed from attendance by parents who do not have philosophical exemptions to vaccines. Please support parents of Oregon by **voting No on HB 3063.**

I will be attending the hearing tomorrow to show my support to other family's and their right to medical freedom.

Thank you!
