

Hello, I am writing on behalf of my family and our beliefs, vaccines are extremely against what Jesus Christ would wish upon His people. The amount of poisonous material in vaccines is alarming, not to chicken egg and human embryo particles. If more people were aware of the ingredients in vaccines I think more people would be cautious as well! Parents assume they are safe, just because a doctor said they are. When in actuality most doctors are hardly educated in the ingredients, side effects, making or anything beyond distribution and collecting money for it. How many doctors are mandated to educate themselves on vaccines? My children's doctor (in a big town with thousands of patients) knew only what was on the box. That's terrifying.

We do not believe that an aborted baby used for vaccines (any of them, there are several!) Should be forcefully inserted in our extremely healthy children's bodies. My oldest son was vaccinated for two years, of which I deeply regret. He has what most would say ADHD and it is very challenging for him. My other three are not vaccinated and completely healthy in every way. What we don't know, is if through vaccinating him for the first two years if his life- played a part in this. I have heard countless stories from other parents as well.

Vaccines should be a choice. This is America, land of the free... We do not need a holocaust here. If this goes through we will be moving, of this I know. I will not raise my children in a place where the government poisons us. Thirty years here or not, and as much as we absolutely love Oregon.

We greatly oppose this bill HB-3063, and beg of you to terminate any plans of furthering.

Thank you.
