

Dear Sirs; We don't understand why there is even any discussion about passing this bill! It is a step into the future, an escape from filthy fossil fuels. It is a chance at new jobs, new industries, and a chance to live in a clean green environment. This has made Oregon a harbinger of the future, and a beacon to the entire nation. It is a positive step to avoid the worst horrors of climate change, and that IS urgent! Please stand up with all that Oregon stands for, and join us in a future of hope!

Thank you.

Betty & Edgard Abadia  
(Mr. & Mrs. Edgard F. Abadia)
