To: Members: Senate Committee on Environment and Natural Resources

Re: [SB 580] I support [SB 580] but additional restrictions should be considered.

Anytime you can ban the use of cyanide and its' analogous salts, do so.

Cyanide is just to deadly, even in the hands of learned and trained personnel.

Cyanide compounds should be highly regulated, have significant restricted access and uses.

The use of cyanide compounds to "kill" wildlife should be banned.

Respectfully submitted,
/s/ David S. Wall
