

Oregon is not a nanny state and we aren't interested in becoming one. Oregon is a place where people think for themselves, and where we open our arms to ALL families--fully vaccinated, partially vaccinated, and, yes, even unvaccinated. Robust health doesn't come from a vial or a pill or a bottle (though that can certainly help.) Robust health comes from a variety of factors, including exclusive breastfeeding, access to clean drinking water, and avoidance of toxins. Not a single case of measles has spread in ANY school in Oregon. We ask Oregon lawmakers to vote NO on HB-3063. We don't want to bar children from school based on their parents' decisions. And health decisions need to be made in the privacy of a doctor's office, not in the state legislature. This bill to end religious and philosophical freedom is discriminatory, unnecessary, and un-American.

This bill will take away a parents right to choose what's best for their child. This Bill will make pro vaxxers who opt out of the flu shot given no choice on if they want to get it.
This Bill will not stop virus' from spreading because some the vaccines shed!
This Bill is going to murder and injure children who like mine can't get vaccinated and have not been able to successfully get a medical exemption even though they have reason to NOT be vaccinated.

Vaccines are not one size all. Vaccines are not safely tested like they should be.
Vaccines are causing family's to lose children, aunts, uncles, nieces, nephews, mom's, dad's, grandparents and cousins.
Vaccines are the reason hundreds of parents have to plan a funeral and bury their NEWBORN BABIES!

No to HB 3063
