

Hello.

I support this 100%. My mom group (mostly anti vaxxers) is super concerned, so I don't know if they're stretching the truth by saying "mandatory" but either way I'm for it! I live near Ashland and their health beliefs are terrifying. If you can enact measures to help protect these kids and the greater population, please help us out. The misinformation crisis is concerning and very difficult to address. Any help is welcome.

Thanks!
