Subject: HB 3063 Testimony

My name is Sheryl Bourgeois and I live in the Portland area. I'm writing today to oppose HB 3063. This bill is completely unnecessary and a massive government overreach. The government has no business getting in between physician's and parent's/patient's. Oregon already has a high vaccination rate. Declaring an emergency over four measles cases, none of which involved a school, is ridiculous and very shady. Removing over thirty one thousand children from school is a horrible idea! Not only will it have a negative economic impact, but it will create a group of underprivileged young people. Not having a formal education will limit them in life. It's wrong all the way around. I'm ashamed to be an Oregonian today. I'm ashamed of my state government too.
