

February 27,2019

I am writing this to contest and oppose Mandatory Vaccination Bill HB 3063. This bill discriminates those of us with autoimmune diseases. The CDC itself states that those with certain conditions should not get certain vaccines, yet this bill would actually go against the CDC guidelines for vaccinations. That is only one aspect of it, then you have the religious and moral discrimination by mandating that we inject ourselves with aborted fetal cell tissue from aborted babies. I do not believe in abortion, nor do I want aborted fetal cells injected into me. By making vaccinations mandatory you are forcing me to fund a profitable industry for doing something I can NOT support. That goes against my constitutional rights!! What happened to the separation of church and state?? You are infringing on my religious beliefs!!

Let's face the facts. You are wanting the people of these United States to be forced into a medical procedure against their will, against their religious beliefs, against the guidelines of the CDC, in order to make an already over reaching pharmaceutical industry even richer. They have no skin in the game, because they have made themselves non-liable for all of the damage they are doing to our children, our society, our American way of life!! How can we keep rewarding an industry that only cares about profit? There have been no clinical studies done to compare vaccinated versus unvaccinated. We are one of the richest nations, with the best health care, yet we are one of the top sickest nations in the world. Why is that?? Why won't you legislatures educate yourself on this issue??? You are deciding the fate of our future generations, our children. We already have 3 generations of children damaged by these same vaccines that you want to make us inject into even more children. Look at the numbers in VAERS, the amount of money that we the tax payers of this country have to pay out for vaccine damaged children that you in politics will have forced us to vaccinate in the first place!! And the pharmaceutical industry who just keeps getting richer and richer, pumping out more and more unnecessary, untested, damaging vaccines and is not held liable for one cent or one damaged child!! These states that want to keep making these vaccinations mandatory, why don't you make the pharmaceutical industry liable and then see what happens?? I bet you anything the push for mandatory vaccines goes away!!

I beg of you to stop this bill and do some research into the damage that vaccines have done. Who is going to pay for all of these vaccine injured children that are now adults?? What if it was your child with an autoimmune disease, or family history of allergies that wasn't supposed to get the vaccine?? What if it was your daughter paralyzed from the Gardasil vaccine? Why is it that when we were younger, we as a nation didn't need all of these vaccines, in the doses they are now given?? Why did we all survive if they are so necessary?? Herd immunity is a false narrative. The only way to truly have herd immunity is thru natural immunity. More adults now than ever and even some children are getting shingles because of the chicken pox vaccine. No one in the United States has died from the measles in over 100 years, they have however died from the measles vaccine. MS in adults is up and diagnoses are rising since the introduction of the flu vaccine, that doesn't even work (wrong strain) by their own admissions.

What's next?? What else will be made mandatory?? What other rights are you willing to vote away? Where will it stop?? What if the next Constitutional Right on the ballot is something that affects you personally?? Please end it here! Don't take the pharmaceutical industries pay outs, stand up to them with honor and say "NO" to Mandatory Vaccination Bill HB 3063!! Protect our Future, Protect our Children!!

Thank you,
