

Dear Representatives of the great state of Oregon,

Did you know that in 1942 Dr. Josef Mengele was wounded at the Russian front and was pronounced unfit for duty. After that he volunteered to go to Auschwitz.

Physician Josef Mengele conducted inhumane medical experiments on prisoners at Auschwitz. He was the most prominent of a group of Nazi doctors who conducted experiments that often caused great harm or death to the prisoners. His nickname was the angel of death.

Interesting fact about Stanley Plotkins, did you know he went to work at the CDC in 1951? Stanley worked in the division of biological warfare for the CDC. The CDC was conceived July 1, 1946 this was four years after Josef Mengele was wounded at the Russian front.

Pictures of the doctor nicknamed the Angel of Death.

Now meet Stanley Plotkins known as the Godfather of vaccines. He has contributed more to vaccines than any other person alive today.

Attached is a link to testimony he gave in a Michigan courtroom, Jan 2018

I think it is interesting when you know a little history, don't you?

I know you are busy in the legislative session and I do appreciate your time. I really hope this was educational for everyone representing people of the great state of Oregon.

Sincerely,

Stephanie Dorr

nicknamed "the Angel of Death", became the surviving symbol of Adolf Hitler's "Final Solution".
