

Dear legislator....

My name is Deirdre Daczewitz and I reside in Salem, OR. I want to express how concerned and strongly against bill 3063 I am for so many well founded, scientific reasons. Not to mention the loss of personal freedom/liberty this would pose on all Oregonians if passed.

Here are just a few....

- 1) Personal and religious freedoms should be protected. Forcing parents to choose between education and vaccinating their children with numerous vaccines is simply wrong.
- 2) This legislation discriminates against families with sincere philosophical or religious beliefs opposing the administration of one or more vaccines to their children.
- 3) It is immoral for the government to force a person to inject a pharmaceutical product into their body, since any medical procedure carries a risk of injury.
- 4) The Oregon vaccination rate is approximately 94-95% for the 7 vaccines surveyed by the CDC. The existing philosophical and religious exemption has not decreased rates and must be left intact. <https://www.cdc.gov/mmwr/volumes/66/wr/mm6640a3.htm>
- 5) As recognized by the U.S. Supreme Court – and evidenced by the \$4 billion that has been paid by the federal government to victims – vaccines can injure and kill an individual. Parents need to be able to make informed choices about their children’s care based on their specific situation, not forced to choose between educating and vaccinating their child.
- 6) The idea that unvaccinated individuals pose a health risk to others is unsupported in the medical literature. In fact, vaccinated individuals can pose greater risk to public health due to a process known as shedding. Scientific evidence demonstrates that individuals vaccinated with live virus vaccines such as MMR (measles, mumps and rubella), rotavirus, chicken pox, shingles and influenza can shed the virus for many weeks or months afterwards. <https://www.westonaprice.org/studies-show-that-vaccinated-individuals-spread-disease/>
- 7) Vaccine package inserts warn of the risk of brain damage, life-threatening allergy, and death and no one knows in advance whom a vaccine will harm. Vaccine ingredients vary, but may contain a variety of toxic ingredients including but not limited to; mercury, aluminum, formaldehyde, cells from fetuses, cells from monkey kidneys, chicken egg proteins, gelatin, and viruses. [http://www.vaccinesafety.edu/package\\_inserts.htm](http://www.vaccinesafety.edu/package_inserts.htm)
- 8) Many vaccines are made using aborted fetal tissue. This article shows one of the world’s leading authorities on vaccination describing the use of 3-month-old aborted fetuses in vaccines. <https://www.investmentwatchblog.com/worlds-leading-authority-on-vaccines-details-the-use-of-aborted-babies-in-vaccines-while-under-oath/>

9) There are hundreds of new vaccines in development including some of the following in clinical trials: HIV, herpes, E. coli, dengue fever, avian influenza, smallpox, tuberculosis, typhoid, norovirus, cholera, smoking cessation, syphilis, and gonorrhea. If vaccine manufactures and others who profit from forced vaccination convince legislators to take away our right to delay or decline a vaccine now, what will our future look like?

10) Vaccine makers and the healthcare providers who administer them bear zero liability for vaccine injuries and deaths. The vaccine manufactures reap all the profits from vaccines, without having to pay for any of the injuries or harm.

Thank you for representing the people of Oregon. No on 3063!!!

Sincerely,

Deirdre Daczewitz
