

I do not believe the government should be able to mandate vaccines. The decision if, when and how to vaccinate should be made by families alone in partnership with their healthcare providers. I personally do NOT want the government involved in MY medical decisions. If and when I choose to receive medical care of ANY kind needs to be my own decision.

For this law to go in effect would be a gross interference in our basic human rights.

My vote is NO on HB3063
