

My 6 year old granddaughter, Ava, was given 1 vaccine at the scheduled time by her pediatrician. My daughter noticed some changes in her. So she decided to put off more vaccines. The pediatrician pressured her to change her mind on this to the point that she stopped going to her and decided to try a naturopath. As time went on it became apparent that Ava had developmental delays in motor and then in speech. She still cannot speak well enough to be understood most of the time. (Has been to countless speech therapy sessions) She has sensory issues also. The many different specialists have told my daughter that Ava is on the spectrum. My daughter has spent the last 4 years educating herself and going to countless doctors and specialists and therapists determined to help Ava. I cannot believe the improvement, especially in the last year. My daughter is not willing to take the chance on more vaccinations. And I do not blame her. In fact, I'm SCARED TO DEATH that she will be forced in some way to. But another thing I'm equally scared of is that every time a law like this is passed we lose another freedom and the ability to control our own lives. Please do not pass another law that chips away at what I thought was the most valuable and precious thing about America. By the way, Ava is home schooled and is benefitted by a private home school group to supplement her education. This bill will threaten her access to that. Thank you for taking the time to listen to my concerns. Patricia Elliott
