

Hi, my name is Tana Jo, and I oppose HB 3063. I do vaccinate my children, and that was my choice, however, I am not comfortable with the fact that more vaccines can be added at will and we can forced to vaccinate our children with them. I am an informed parent, and I did my research on the vaccines my children have had. It makes me sick to think that we could be forced to vaccinate something we are not comfortable with into our children. It should be every parents right to make these decisions for themselves. Please vote NO on HB 3063.
