

To whom it may concern,

I own a small business and I am an Independent contractor. I am able to work part time so I can be at home with my 2 kids, My business would go out of business if this passes and this definitely discourages entrepreneurship. I am fully against this from passing. I would love to be able to show my kids how hard work and being able to own your own business is possible. If this passes that would be one more hurdle for Independent contractors/small business owners to go through to make a life for our families.

Thank you for your time.
