

Good morning Oregon Legislators,

There's currently a whooping cough outbreak in a Los Angeles school. They have a very high vaccination rate and there was a higher percent of vaccinated students who contracted whooping cough than those who were not vaccinated. Check it out here:

<https://www.latimes.com/local/california/la-me-ln-whooping-cough-harvard-20190226-story.html>

Just another reason why I oppose HB 3063. You are still going to see outbreaks and the Oregon Education system is going to lose tons of money while doing it.

Please reconsider your bill and have a good day!

A proud Oregonian
