

Dear Senators and Representatives,

Like you, I am very concerned about my own health, and the health of fellow Americans, including my own children, grandchildren, and all our children.

I, like you, want to be able to make informed choices for my own health and that of my family.

Please support freedom of informed choice, freedom from coercion and force from being forced to undergo medical procedures (yes, injections are medical procedures) and medical experimentation (yes, even long time vaccines have not ever been properly studied and new vaccines which get added to the "schedule" have been studied even less and are been experimented on our children, nurses, expectant mothers, and other vulnerable people).

Keep America the place where we are free, and not like those other countries which we disdain, like China and Russia, who are coercive and cruel. Please, listen to the voice of all the people who are having difficulty being heard, because of the loud and money - funded voice of the large corporations, including government bodies like the CDC, NIH, WHO etc.

Thank you for listening and using your mind and soul to listen to the voice of the public and allow exemptions, refuse laws which mandate certain medical procedures, etc.

N Seinfeld
