

Bill 621 is pure insanity, it's a joke right?

Not only does Bill 621 step on my rights as a member of a community to regulate the use of the buildings and resources within my community, but it is disgusting that the representative that introduced it himself as a vacation rental owner. State housing goal 10 already is under appreciated and underutilized as a tool to make sure that all Oregonians have housing. This spits in the face of those who want to make sure that everyone has a home and that our resources are properly managed. Don't let this bill leave committee. It's disgusting and wrong for Oregon.
