

Dear Healthcare Committee Members:

I am writing today to ask you to oppose House Bill 3063 to remove non-medical exemptions for vaccines.

Vaccines have been determined to be "unavoidably unsafe" and as such, informed consent and parents working together with their doctors to make the best decisions is of utmost importance.

Some people have risk factors that put them at higher risk of a reaction. Others have risk factors that put them at higher risk for certain diseases, and a parent should be able to weigh the risks and make informed decisions.

When faced with the choice to vaccinate on a pre-determined schedule or remove their kids from school, this takes away true informed consent!

Please oppose HB 3063.
