

Good morning Governor, Senators and House Representatives, I am writing to oppose mandatory vaccination by the government. I do vaccinate my children and am fortunate they do not have adverse reactions to the medication and treatments at this time. However, if they did, or I decide it isn't a necessary vaccination or life threatening, I would want the decision to subject them to the vaccine to be my decision with the assistance of their pediatrician. Not a direction/order to come from a government entity. This is NOT an emergency. Please vote against this bill.

Thank you,
Stephanie Moll
