

Dear legislators,

Please why.....? Why cant the vaccine companies go thru more vigorous detailed lengthy testing before they decide to approve them for public.? Please listen to the testimony put forth today. Please listen to the toxicology reports.....please use your best judgment. Taking away our own rights for our own bodies is so very wrong. If vaccines are to be mandatory, then they as sure as hell need to be tested over and over until they are really safe! I do not agree with this bill.

Respectfully,

Holly and Jeff Rieder
