Dear Sir or Madam,

My name is Angela Borland and I'm writing you to express my opposition to HR3063. This bill infringes on parental rights, access to public education, and medical freedom. Any and all medical treatments, regardless of the risk or the benefit, should never be mandated by government and should always be left to the discretion of the individual (or parent). We learned this from the Nuremberg war trails.

The current measles outbreak is hardly an emergency since the numbers are so low and is most likely the vaccine strain of the virus that is causing the illness. Science has even named the phenomenon "The Measles Paradox" but this information is not being reported on by the media.

The current MMR vaccine has been called out as both medically damaging and ineffective, according to the Hooker/Thompson CDC whistleblower case and the lawsuit filed by mumps scientists against Merck. Those cases exposed fraudulent science used in the production, testing and marketing of the vaccine. Please read these cases before voting. Your constituents deserve to have a properly-informed lawmaker making decisions for them, especially medical decisions.

Please vote no on HR3063 and preserve our rights to medical freedom, access to education and parental rights.

Thank you.

Sincerely,
Angela Borland
