Subject: House Bill 3063
Date: Thursday, February 28, 2019 3:00:57 PM

To Oregon legislature and representatives,

I am contacting you to express my concerns regarding the House Bill 3063 which would eliminate non-medical exemptions from vaccinations for school children in Oregon. I strongly oppose House Bill 3063. I am a mother of one and one on the way. Our family suffers from Lyme disease and we have followed the CDC's protocol utilizing rounds of antibiotics and pharmaceuticals, only to remain sick and suffering from long term effects of antibiotic/pharma use. Western medicine failed our family but we are steadily regaining our health with alternative practitioners in Oregon. We have spent years educating ourselves on health matters. We eat certain foods, live a certain way and reduce our exposure to things that would harm us so we can maintain our health and contribute to society. A vaccine mandate would endanger the health of our children and probably force us to relocate.

Lyme and poor Western medical advice robbed us of our health and livelihood. We are grateful to live in a state that honors personal medical freedoms and allows families and their doctors to make choices in the best interest of their health and well-being. I hope we can continue our healing path in this amazing state.

I found this article very helpful and appreciate the suggestions our legislators should be taking in regards to vaccines:
