

## Vote NO on HB 3063

I am Justin Reynolds and I am against the HB 3063 Bill. It is my right as a father to be able to decide what is best for the health of my daughter. This bill threatens my right as a US citizen as it impacts my religious beliefs and rights to medical freedom. Taking away the right to decline vaccines or not be able to go to school is ludicrous. Every parent should retain the right to refuse vaccinations without being coerced. All children should have access to an education regardless of their vaccination status. The ingredients in vaccines are scary and alarming for example; formaldehyde, thimerosal, aborted fetal cell lines, polysorbate 80, etc etc etc. I am morally opposed to injecting others DNA and toxic chemicals into the body.

I hope you Vote NO on this bill!
