To Whom It May Concern:

As an Oregon resident , I am vehemently opposed to HB 3063, which would eliminate all non-medical exemptions to vaccinating children in Oregon. I am a mother and grandmother who's family have never vaccinated (ourselves or our children), and feel very strongly that it is our right as parents to choose healthcare methods for our children, and still be able to have access to public education in Oregon. There are other ways to ensure that our children are healthy and protected against diseases, but unfortunately many of these safer, effective, alternative methods, (that our family uses successfully) are not recognized by the mainstream medical community, and therefore are not considered valid. Please uphold our right to freely choose healthcare options for our families..... there is not only one way! I am very concerned that our rights as parents are slipping away around the country. Please do not let Oregon succumb to this ! I live here partly BECAUSE our religious and belief freedoms are still intact. Thank-you very much for hearing my heartfelt plea!
