---

My name is Lauri Tauscher.  
I am writing in opposition to HB3063.  
I live in Clackamas, Oregon

I am a professional. I am a Mechanical Engineer. I am not a wild eyed, uneducated, fanatic.  
My opinion was not reached lightly. I have read extensively on this issue and listened to dozens of doctors discoursing on both sides of this issue.

My main opposition to this bill is that I believe medical treatment of any kind, but specifically injections, including vaccinations, should be voluntary not mandatory.

This bill goes directly against the medical ethics adopted by the Nuremberg Code: "The voluntary consent of the human subject is absolutely necessary".

In the evidence provided by researchers on both sides of this issue, I have not seen any documented evidence that people who choose to not vaccinate pose any risk to those who choose to vaccinate.

So, it is troubling to me that as a purported free society, we are even considering mandatory vaccination of individuals who choose to not vaccinate.

I respectfully submit that HB3063 has no place in a free society.

Lauri Tauscher, BSME
