Date: Thursday, February 28, 2019 10:22:39 AM

Hello,

My name is Marlo Maroon and I live in Portland. I'm newly married and my husband and I are excited at the prospect of growing our family. I'm not an extreme person and believe that we all should have the right to choose what and when we put things into our bodies. I'm asking for this bill to fail as it will have great impact on our community and not in a positive way. More than ever we need government to hear our voices and respect where we are coming from. It's not about being for or against vaccines but more about medical choice and human rights. Please don't take those away.

Thank you for listening.
