---

**Hello,**

**Thank you for taking a moment to hear my testimony.**

**My name is Melissa and I'm a mother of two. I have one son who is vaccinated and one who is not due to personal reasons.**

**I find house bill HB 3063 incredibly alarming. To me this is about medical freedom.**

**This would void my rights to vaccinate on a delayed or selective schedule, skip flu shots, skip HPV or choose to not vaccinate at all. This doesn't feel right to be forced on how and when to subject my child to a vaccine that I may not choose to give if it isn't in the best interest of my child. My physician and I should be able to decide this.**

**Please consider things that are of greater importance than mandatory vaccinations. It should stay the people's choice. Not yours to make for my sons.**

**Thank you,**

**Melissa (a concerned parent)**
