

No on HB 3063

>

> Please, listen to the people. This Bill violates our rights and our  
> voice, We have the right to make our own educated decisions and  
> choices as citizens of this state and country. This Bill takes away  
> our legal rights for Medical Informed Consent. This Bill will also  
> cost our state too much money, it will have large financial burden on  
> our Education, Medicaid and Medicare systems.

>

> As a parent I have done well over 400 hours of studying on  
> vaccinations. I'm not anti-vaccine, I'm an ex-vaxxer & pro common  
> sense. People cannot pass these bills fairly or ethically without  
> hearing, reading and listening to all the real research that has been  
> done. There is so much research, thousands of studies and journals  
> that state VACCINES ARE NOT SAFE AND EFFECTIVE. The vaccine products  
> have not gone through any double blind placebo studied nor been  
> studied at length like any other medication on the market, therefore  
> they cannot be termed, safe and effective. That is a coined marketing  
> term by Big Pharma that has been disproven. One can see for  
> themselves in CDC writing and the United States Supreme Court has stated they are unsafe. You  
> cannot pass this bill based on limited information.

> Listening to the Pharmaceutical industry, or representatives backed by  
> Big Pharma, or physicians who are backed by Big Pharma, or the media  
> who is again backed by Big Pharma (using a fear based message tactic)  
> is completely biased and let's look at who is funding some of these  
> representatives pushing these absurd bills, again Big Pharma. Please  
> hear and listen to just a fraction of individuals who have done the  
> studies, read through the journals and have seen the real numbers and  
> harms of vaccines, to name just a few highly respected individuals... Robert Kennedy Jr., Dr. Toni Bark,  
Dr.

> Suzanne Humphries, Dr. Stephanie Seneff, Dr. John Bergman, Dr. Jack  
> Wolfson... Hear what the CDC whistle blower, William Thompson has  
> brought forth, the corruption that has taken place within the CDC and  
> Pharmaceutical industry. Before being able to determine that you know  
> what is best for our children, how about you let us make these informed decisions for ourselves.  
> Our bodies, our right, our choice! Why is government getting involved?  
> This is Tyranny! We are talking about a liability free product that  
> HAS NOT gone through the appropriate safety studies that any other  
> typical drug has. No double blind placebo studies and our right to  
> choose to have these chemicals injected into our bodies and our  
> children is being taken away. This does not make sense. Where is the informed consent, which is a  
legal requirement.

>

> Let's remember the NUREMBERG CODE: 1. The voluntary consent of the  
> human subject is absolutely essential. This means the person involved  
> should have legal capacity to give consent; should be so situated as  
> to be able to exercise free power of choice, without the intervention  
> of any element of force, fraud, deceit, duress, over-reaching, or

- > other ulterior form of constraint or coercion; and should have
- > sufficient knowledge and comprehension of the elements of the subject
- > matter involved as to enable him to make an understanding and enlightened decision.
- >
- > The American CDC says that ANYONE who has a "weakened immune system"
- > OR who has a parent, brother, or sister with "immune system problems"
- > should NOT get an MMR vaccine. Based on the CDC's guidelines, a lot of
- > children should not get an MMR vaccine. It seems that the MMR vaccine is clearly not safe!
- > <https://www.cdc.gov/vaccines/hcp/vis/vis-statements/mmr.html?>
- >
- > "Vaccines are not actually making or keeping children healthy.
- > Instead, in the U.S. (where children are the most highly vaccinated in
- > the world), over half of all young people have a chronic illness—a
- > trend that coincides with the expansion of the nation's vaccine schedule." Robert Kennedy Jr.
- >
- > It's common sense to "actually" read the pamphlets before vaccinating. Fact:
- > Vaccines have caused more neurological damages to kids creating more
- > immune-compromised children. When the liability of the vaccines were
- > taken away in 1986, the schedule has increased from just over 20 doses
- > of 8 vaccines in the 80's to over 70 doses. In 1985 autoimmune and
- > neurological damages in our children was around 12% and today it is
- > more than 56% and climbing. Causation and correlation have got to be looked at, common sense.
- > So as a parent we are being forced to vaccinate our children, this
- > poses a risk, like playing a game of Russian Roulette. All one has to
- > do is read the inserts wrapped around each vaccines to realize these
- > vaccines pose far more risk to our children's health than if they had
- > the chicken pox, measles, mumps, pertussis... Myself, my siblings and
- > my parents had most of these childhood illnesses and many, many others
- > did to, we survived, undamaged and now we have stronger immunity and
- > lifelong immunity. Having surgery and medical malpractice pose more of
- > a risk than these illnesses that we are vaccinating for. Today, we
- > have more vaccine damaged children and adults, how are we as a state
- > and country going to be able to afford the medical coverage when they
- > hit our Medicaid/Medicare system? That's a scary and realistic
- > thought. Should this Bill pass, thousands of parents, like myself,
- > will be forced to pull their children out of the public school system.
- > I guarantee you will have many families move out of the state, to one
- > with less restrictions and that protects our medical freedom. Again, more money the state will lose.
- >
- > It's common sense to question why a Doctor would be force vaccinating
- > a child against an STD on the day of their birth when both parents are clean.
- > (Hep. B)
- >
- > It's common sense to disagree with the legality of my Doctor receiving
- > bonuses based on the number of patients s/he vaccinates.
- >
- > It's common sense to question the integrity of a 60 billion dollar
- > pharmaceutical industry that successfully bought legislation that

- > makes them free of all liability when they cause harm. In 1986 when
- > the liability was taken away from the Pharmaceutical companies, Health
- > and Human Services
- > (HHS) were directed to, twice a year, file vaccines safety reports. In
- > 2018 ICAN (Informed Consent Action Network) sued HHS and won. HHS
- > openly admitted to not having filed any vaccine safety reports in over
- > 30 years. Common sense, what incentive does Big Pharma have to be sure
- > these products are safe, no liability and no one is bothering to do
- > safety checks on them. This is Alarming!
- >
- > It's common sense to be concerned when vaccine producers "donate"
- > millions of dollars every year to the people who help determine the
- > suggested vaccine schedule. (Academy of Pediatrics)
- >
- > It's common sense to question the integrity of a system where the
- > former Director of the CDC is now Vice President for the largest
- > vaccine producer in the world.
- >
- > It's common sense to weigh the risk verses benefit, like any other
- > medication. It's our right and should continue to be our right to make
- > this choice for ourselves; Informed Consent and Nuremberg code.
- >
- > It's common sense to question the ingredients, the FDA says only 25mcg
- > of Aluminum is safe, Aluminum is a neurotoxin.
- > At birth a child receives 250 mcg of Aluminum 2months 1225 mcg of
- > Aluminum 4months 975 mcg of Aluminum
- > 6 months 1000 mcg of Aluminum
- > 12 months 600 mcg of Aluminum
- > 15 months 625 mcg of Aluminum
- > 18 month 250 mcg of Aluminum
- > That's almost 5000 mcg of Aluminum injected into a child by 18 months.
- > Then there are more Aluminum exposure with the boosters.
- > It's common sense to connect these numbers to the increase of
- > neurological disorders in our children and why America has one of the
- > highest infant mortality rates in the first year of life. Let's also
- > look at the increase of special needs children in the schools and what
- > that is costing the education system.
- >
- > It's common sense to find out for yourself the number of people that
- > have been adversely affected by vaccines, thousands and thousands have
- > been injured and killed by vaccines. Look into VAERS, (if you are
- > pushing this bill you should be aware of VAERS) over 4 billion has
- > been paid out to families that have suffered vaccines injuries and
- > death. This number of Vaccines Adverse Event Reporting System is
- > actually flawed and the number is much higher, because most go unreported.
- >
- > It's common sense that it's wrong to pay injured families only if they
- > agree to be silent about their adverse reactions.

>  
> It's common sense that when "risk of death" is listed as a side effect  
> on a vaccine, for a disease that isn't life threatening, it might not  
> be worth giving to my healthy child.  
>  
> It's common sense to question western medicine when 60 years ago they  
> encouraged pregnant women to smoke.  
>  
> It's common sense to question western medicine because of how long  
> they knew cigarettes caused cancer, but remained silent due to the  
> amount of money that was involved.  
>  
> It's common sense to be weary of everything when our country is the  
> sickest it has ever been.  
>  
> It's common sense that most people aren't willing to do the research,  
> but I was, and I won't stop the pursuit of a less corrupt medical system.  
>  
> I'm not anti-vaccine, I'm pro common sense. And if those making these  
> choices for us are not aware of all that I mentioned above, then how  
> can you morally take these rights away from us and feel that you have  
> the power and right to move this Bill forward. Remember, not one  
> medical procedure or medication is one size fits all (again common  
> sense) and can have serious reactions or simply not work properly.  
> Vaccines are no different and do not provide lifelong immunity, it  
> will fill our bodies with heavy metals and neurotoxins that can and do  
> have lifelong negative impact on the health of our bodies, this will  
> negatively impact our Medicaid/Medicare and Education systems, costing  
> more money than it can handle. Do you want to be responsible knowing  
> you pushed a bill through that put a huge financial burden on our  
> state and contributed to the increased of cancers, autoimmune and  
> neurological disorders in our state and our country? You have the opportunity to stand up and stop  
this nonsense and protect our rights.  
>  
> Please let us make our own medical decisions. We do not take this  
> lightly, we do our research, let us choose what is right for  
> ourselves, not government. Don't let Big Pharma buy you, remember our  
> legal rights to Informed Consent and do not forget the Nuremberg Code.  
> This Bill goes against our rights and pushes a special interest agenda, not for the people.  
>  
> Sincerely, an extremely concerned mom and citizen,  
>  
> Thank you!
