

To all whom it may concern,

I strongly oppose HB 3063 for many reasons, none of which are unique to me, and include government overreach, ethics, safety, and liability.

In my own personal experience, my two children are partially vaccinated because I've personally researched the safety, risks, purpose and efficacy of each vaccine AND discussed such with my children's pediatrician. I do believe some benefits outweigh the possible risks but in other cases, I feel the opposite is true.

Vaccines are a product of pharmaceutical companies that care about profit over protection. They have no liability because of the National Childhood Vaccine Injury Act of 1986 which made it impossible for parents to sue manufacturers for product defect. Have you read and researched the ingredients in every vaccine HB 3063 will require? Without doubt, I have personally seen harm caused by vaccine.

I do not believe you should have the power to overrule informed consent.

Please oppose HB 3063.

Sincerely,  
Stacey Yarrish
