

Dear Member of the Legislature,

Please oppose HB 3063. This bill is an infringement on our right to bodily autonomy and informed consent. The US Supreme Court has ruled vaccines as “unavoidably unsafe’ and where there is risk, there must be choice.

I personally know multiple mothers who's children had ongoing seizures for years directly after receiving the MMR vaccine. I have one child half vaccinated, and one with none. I would rather take the chance of them contracting measles than having on going health issues for he rest of their lives. The largest largest measles contraction was from a man receiving the MMR boost the day prior in NY 10 years ago. The FDA is adding more and more vaccines and higher doses to our young children's bodies. The chickenpox vaccine came out when I was 10 years, old I remember when I received it because I haven't had the chickenpox yet. Well that is yet another vaccine that is added to the many doses to our un-developed babies bodies. Last visit to our check up to receive my first born second round of vaccines, the doctor said "don't worry they took out all the bad stuff."

Admitting to administrating vaccine that were harmful and unknowingly doing it. After that I couldn't do anymore.

Sincerely,

Amanda Sumpter
