

Dear Madame Chair Andrea Salinas and Committee,

I am writing this letter on behalf of my friend Abigail and her sons in opposition of HB3063. I have witnessed the physical and emotional hardship that these children and their parents have gone through as a result of being vaccinated. As a mother of 2 children, I believe it is unfair to exclude children who have had adverse reactions to vaccines and have been denied a medical exemption. I believe this is an infringement on parental rights, religious freedoms, and bodily autonomy. This is a slippery slope of governmental overreach that will have serious ramifications on the overall health of all our children. I am respectfully asking that you exercise your authority as legislators in a just and upright manner and oppose this Bill.

Best Regards,

Jennifer Patino
