

Dear Committee,

I have 2 of 2 sons with life threatening food allergies. Both sons got vaccines when they were less than 1 years old. I do not support HB3026. Doctors can not tell me a root cause of food allergies. It is not safe to give them any more vaccines because their immune system is compromised. Their bodies attack a food protein like it is a virus. People need to choose what to put inside their bodies. If my children where forced to eat one of their food allergens, they would die.

- These hearings need to be fair, balanced, and include opposing viewpoints. We have many highly qualified individuals to present those viewpoints.
- Over \$4 billion has been paid out for vaccine injuries and deaths and HHS estimates less than 1% of adverse events are reported. Mandating any procedure involving such risks is unethical.
- HHS has failed in its Congressional directive to study vaccine safety for 30 years.
- Mandating liability-free vaccines that have not been properly safety tested is in direct opposition to the first tenet of the Nuremberg Code: ***The voluntary consent of the human subject is absolutely essential.***

Please oppose HB3026.
