

I Oppose this Bill.

Oregonians cannot afford to be burdened by this Bad Bill. HB 2020 will increase costs of living for all Oregonians across the board!

All business in Oregon Will be penalized and jobs will be lost.

This law will generate, through theft, approx. 600 million dollars for the 'state' with Zero accountability as to allocation.

The Director of Oregon State University Climate Change Research Institute has stated that this bill would have as much as.... no impact on Global Climate.

All Oregonians, as a whole, love our state and our environment. This Bad Bill will harm ALL Oregonians with needless expense. The state has not made clear how this will be implemented...IE: No Oversight!

The State has Zero legal authority to change, by this bill, the economic climate in OUR State!

We as a people have suffered long enough with the destruction of OUR logging, Farming and Fishing industries being destroyed...with help from those which where HIRED to represent US!
