

Although I understand the reasoning behind the idea of this bill, I do not understand why it's being allowed and our rights are being infringed on. This will take away our RIGHT to CHOOSE medical care/treatment. Allowing this mandatory medical treatment, is opening doors for the government to force other treatment without choice.

There has not been enough studies on the effects of ingredients in the vaccines. What does injecting other human DNA do to another body? What about animal(monkey) DNA. Or what about the consideration for the millions of people who do not believe in abortion. KILLING and innocent LIFE then having the MURDERED child's tissue be used and injected into our bodies. It's not fair, it's unjust, it's immoral.

We have constitutional rights for a reason. They should not be infringed on.
