Subject: Pro vaccine, but oppose HB3063
Date: Friday, March 1, 2019 1:45:02 PM

I am pro vaccine, but oppose HB3063 as written. I believe there should be amendments:

- online public school should be available to children who are not vaccinated
- private schools should be able to choose whether to allow non-vaccinated children
- children currently in school as non-vaccinated students should be grandfathered in
- medical exemption should be the only exemption for vaccination, but is easily attainable. A written letter from the child's physician will suffice.

I want to protect our kids who cannot be vaccinated, but don't want to create so many restrictions for the non-vaccinated.

Thank you for reading my opposition to HB3063 in it's current form.
