

To the Legislature,

I, Timothy A. Land, write here to state that I do not consent to HB 3063. I was educated here in Southern Oregon to a Graduate degree as a teacher for the youth of our great state. With this degree, it is understood that I know the skills to perform, and the value and importance of doing research in order to educate others. As a parent of an 8-year-old son, I have a vested interest in investigating anything that could cause him harm while looking out for his well being. In my extensive research on the safety and efficacy of vaccinations, I have concluded that the risks far outweigh the proposed benefits for my son, my students, and my community here in our great state, as well as brothers and sisters from sea to shining sea and around the world. Conversations about vaccinations with my doctors and my son's doctors have given me enough information to deem that one vaccination may be one vaccination too many and that is a risk I am not willing to take. There has been no double-blind placebo-controlled studies on vaccines, nor has the development of this product advanced enough to look at the long-term effects the current CDC recommended schedule has on the health of our children and the role genetics and immunobiology play in their safety. Therefore, to mandate vaccinations equates to medically experimenting on my son against my consent and is in direct contradiction to the Nuremberg Code Point #1 stating the voluntary consent of the human subject is absolutely essential. Armed with this information and my belief in a higher power that many would call God, the Great Mystery or the Creator, I have chosen to exempt my son from vaccinations on religious and philosophical grounds. HB 3063 violates my Unalienable or Natural Rights granted by our Creator and protected through our Declaration of Independence, Constitution and Bill of Rights. The U.S. Constitution was written to protect the Natural Rights of each citizen from being tampered with by legislators. The 1st amendment states that "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof..." Therefore, it is impossible for a good-standing public servant of the Republic of the United States of America to protect this right and vote to remove the right of the people to choose an exemption from vaccines on the basis of religious and philosophical grounds. This can only be possible if the public servants sworn to protect the people have their hands in the cookie jar of the multi-billion dollar big pharma corporations that have paid out billions of dollars in hush money to the survivors or families of those that have been injured or killed by vaccines. HB 3063 is tyrannical government overreach into what is going on in my son's and my student's persons. My son is a citizen of this great land. He has the same right as every other young citizen to receive a public education. Being that only a tiny fraction of school-aged children are unvaccinated, his exclusion from the same education as offered to a vaccinated child is discrimination of a minority. Let it be known that I have chosen to give this notice of my opposition to HB 3063 as a proud, voting citizen of the United States of America. If you are a servant of our Republic and have sworn an oath to uphold our individual unalienable rights of Life, Liberty and the Pursuit of Happiness, then you shall oppose this bill because it violates the authority and custody of a parent to seek these self-evident truths for their children.

In summary, I oppose this bill because it stands in direct violation with the Nuremberg Code, it violates our 1st amendment rights, increases government overreach, is discriminatory over a minority group, and is in direct opposition to Life, Liberty and the Pursuit of Happiness.

Thomas Jefferson said, " If the people let government decide what foods they eat and what medicines they take, their bodies will soon be in as sorry a state as are the souls of those who live under tyranny. Please oppose HB 3063 and instead, focus your desire to protect our children by demanding true vaccination safety studies, make manufacturers of vaccinations liable for vaccine injuries and death and take the "Big Pharma" lobbyists out of the government.

Thank you,

Timothy. A Land
