

To Whom It May Concern;

I strongly urge you to vote NO on HB3063. This is a gross over step by members of government. Our children's access to education should not be held as ransom over their head depending on their parents choices for their vaccines. It is beyond wrong to force parents, who undoubtedly have their own children's health in their best interest, to inject them with vaccines which in all actuality may not have years of research and safety behind them. It is wrong to withhold their education for ANY reason. Oregon already has a low graduation rate and this could effect that further. We NEED kids in school and need the government to stay out of our bodies.

I want to reserve the RIGHT to know and choose how my child's body is handled at all times. This is not the governments job to legislate, in fact, I find it intrusive and absurd. I feel this is an abuse of power, pure and simple. I do not want the government to have free reign to tell me what I will and wont inject in MY child. I almost cannot believe that this is a question as it is NOT the governments job to either deny my child education in this state, or to say what I, as the parent do to their precious body. I have in fact vaccinated my children, and I still find this WRONG. I do not want to lose my rights as their parent, or to have someone say down the line that I must now comply with some new set of vaccines they see fit.

Another issue to consider it big pharma here, there are many vaccines and drugs on the market that stand to make others wealthy. The do NOT have our best interest in mind. They will be happy to create "new vaccines we NEED" so that they make money and we are then forced to pay to have our kids injected. This is sick. This is not safe for our children,

I know what is best for my child, NOT you or other politicians. Please vote No on HB3063. As this is what your constituents are urging you to do as their elected official. Please remember your job is to work for us. That is why you hold this office for to be a voice for us, not to do what you want personally. Please represent us in this matter.

Please vote no to this scary, intrusive and wrong measure.

Whitney Steitzer (mother of 2) and family
