I oppose House Bill 3063.

Parents should not have to choose between a public education for their child, and making the decisions regarding vaccines that are in keeping with what they feel is in the best interests of their child's health and/or in alignment with their religious or philosophical beliefs. Parents may wish to accept some vaccinations for their child and not others; this should be their choice. Only a very small portion of the citizens in Oregon are unvaccinated (about 2.6%). The majority should be impose upon the minority.
