

Hello,

I am asking you to oppose house bill 3063.

As a mother of 3, I vaccinate my children but we do not do all vaccines like the flu shot. If it were to become mandatory to vaccinate ALL the vaccines, including the ridiculous new ones in order for our children to go to school, we will absolutely start homeschooling until we find a home in another state where our freedom to choose what goes into our children is still available. These vaccines are not clean or sufficiently researched to show the side effect in which DEATH is one of them. My family also fosters here in Washington County and I know the crisis for foster homes. If you pass this bill, you're losing our tax dollars and another wonderful foster home. I also am a small business owner and own a boutique in Bridgeport Village as well as a health and fitness business my husband runs. These are all things that Oregon will lose out on if this bill passes and I know I am just 1 person who is opposing this. The ripple effect that Oregon will feel if this bill is passed will indeed be efficient.

Please oppose this bill!

Brittani Morton
