

I am writing to request this committee vote NO on HB3063. In Nazi Germany the government allowed Bayer and IG Farben to conduct medical experiments on German Jews and anyone else thrown in their concentration camps. It is bad enough that in 1986 the US government granted vaccine makers freedom from prosecution making it so that there is no need for vaccine makers to ensure QUALITY of their product. In fact, vaccines have been found to be contaminated from improper storage...as in the case recently in Kentucky, Ohio and Indiana (see: <https://local12.com/news/local/contaminated-vaccines-distributed-in-kentucky-ohio-and-indiana> ).

No government should ever take away a person's right to deny a vaccine. Think about this before you give away our right to choose. It can happen to you.

"In Germany in the 1930s, people with TB were stigmatized, prohibited from marrying, forced to undergo sterilization, and eventually euthanized in the so-called "mercy-killings." Once the war began, the Nazis used TB as a form of biological warfare. Nazi doctors euthanized TB sufferers throughout Germany and the eastern occupied lands or used TB as a convenient excuse to kill those they deemed "life unworthy of life," such as the Jews, whether they actually had TB or not. They conducted torturous medical experiments on children and adults in ill-conceived attempts to find a TB vaccine or effective TB medications. The Nazi state also stimulated TB epidemics. Crowded living conditions in the ghettos and camps, poor sanitation, and near starvation diets contributed to the spread of the infectious disease. When the Allies liberated the camps in Germany and Austria at the end of the war, TB was the most serious infectious disease they faced. This chapter argues that the Nazi state used TB as a justification for murder and targeted disease by eradicating people." from <https://www.karger.com/Article/Abstract/481474>
