

Hello,

My name is Chantel Santos, mother of 3 beautiful little girls and I am writing to tell you that I oppose HB 3063, the bill to end all non-medical vaccine exemptions for Oregon school children.

I wholeheartedly believe that parents shouldn't have to choose between fully vaccinating their children or having access to an education.

I'm just a mom. Not a doctor, not a teacher, not a scientist. Just a mom, that has 100% seen vaccine damage and refuses to play russian roulette with my children's health. I pray all families with children not completely up to date will not have to choose between home education or vaccines, because I know I will always choose what's statistically safest for my girls. Vaccines are not 100% safe. There is risk. Where there is risk, there should be choice. Sick children are allowed to attend public school, why wouldn't my healthy child be allowed to? Live vaccines shed. Why should a student that just received any of the multiple live vaccines required for school be able to go to school when my healthy child can't. There are simply too many what if's and not enough studies to answer all questions regarding vaccine safety.

I hope you will not support this bill.

Thank you for reading,  
Chantel Santos  
Wilsonville Oregon.
