

Honorable Representatives,

As a 3rd Generation Oregonian and an 18 year veteran teacher in our public school system I urge you to oppose HB3063.

Like others who have undoubtedly written you, I have many reasons to urge you to vote no. The tragic irreversible damage done by faulty vaccines is a reality and justifies a parents right to decide when and if a child should receive certain vaccines.

I am opposed to the removal of freedom of choice from educated thoughtful parents who love their children and to delay, divide, or even decline certain vaccines. I hope you are too.

Thank you for honoring the voices of your citizens and stakeholders.

Mason Smith
