Subject: Mandatory Vaccines
Date: Thursday, February 28, 2019 5:34:01 PM

I firmly oppose HB 3063.

It is absolutely unethical and tyrannical for the state government to require vaccines in exchange for entry into schools, or anything else.

I have researched vaccinations extensively and am cautious about them in part because of the adjuvants used (the neurotoxic chemicals that are used to override the immune system so the body circulates the "medicine"), how they interact with the body's natural immunity immediately, the numbers of recommended doses given at birth when the baby's immune system is not developed, and then by the age of 18 (88), the **exemption of liability of their manufacturers**, that there have been no double blind and scientifically sound research studies proving safety; as well, that the **CDC - the agency which develops the schedule also holds many patents for and is making billions of dollars a year on vaccine** administration. It's the worst of government corruption when the head of the CDC is also the former CEO of a big pharma company, in my opinion.

This experiment with vaccines may have been beneficial in some regards but to mandate any medication is absolutely unethical and tyrannical.

Today we are in the midst of an opioid crisis. Oxycontin was the miracle non-addictive, long lasting pain killer or so we were told. Statin drugs were also sold as a medical miracle. Vioxx killed at least 60,000 people before it was removed from the market.

Gardasil, the vaccine for HPV (human papillomavirus), may not be as safe as backers claim. [Judicial Watch](#) announced it has received documents from the Department of Health and Human Services (HHS) revealing that its National Vaccine Injury Compensation Program (VICP) has awarded \$5,877,710 dollars to 49 victims in claims made against the highly controversial HPV (human papillomavirus) vaccines.

Many don't know about the National Vaccine Injury Compensation Program (VICP) that was instituted in the 1980s to compensate the vaccine injured, removing all financial and ethical responsibility from vaccine manufacturers.

I urge you to vote against HP 3063. If vaccines are such a safe and wonderful protection against diseases, they shouldn't have to be force.
